IN OUR OFFICE

Workaround – Transformable furniture system

Workaround is a pop-up furniture landscape, transforming along with the different activities and needs within a small scale office. While promoting interior variations it also allows for new, exciting perspectives and working positions from one day to the next.

The see-through plastic is enhancing the transparency at the office promoting collaboration and interaction. Just as much as it is an ever changing furniture for teams it is also a tool for creating trust and relations within a space.
