

## FLATSPOT

Interact. Customize. Experience.

Humans are by nature drawn to objects that make us wonder and create a desire to interact. With this luminaire the idea was to design a talking piece. Something you are curious to explore. By utilizing earth's gravitation, we can manipulate how we control digital objects.

The three flat-spots in this luminaire are each representing a hue value. When flipping between the sides you can color grade your surroundings to fit the occasion. To adjust the brightness you dim the luminaire by rotation.
